# COWICHAN VALLEY SCHOOL DISTRICT

INQUISITIVE DESIGN AND TECHNOLOGY PROGRAM

The Inquisitive Design and Technology Program offers students from grade four to seven the opportunity to learn through investigations supported by effective use of technology. The philosophy of the program is one where students focus on developing solutions to real world problems that are meaningful to them and related to the curriculum. Students will build skills in creative and critical thinking, collaborating in groups and making connections with experts in the community. Learning opportunities will be enhanced by the infusion of technologies that redefine when and how learning takes place.

Students will work at a distance from their school classroom approximately 50% of the time. Students participating in this program will need to have access to a 2018 or newer iPad or similar. Those students without this technology will be provided an iPad, on loan, that is setup and monitored by the School District's Instructional Technology Services Team.

One of the frameworks informing our practice in this program can be found by clicking on the icon below.

HOW MUCH TIME WILL MY CHILD SPEND AT THE SCHOOTI
